EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Edward W. Tracy, Jr. (Reg. 47,998) on 3/14/2008.

The application has been amended as follows:

Please add the underlined words.

6 (Amended) A portable wireless apparatus, comprising:

a conductor board including at least a circuit board;

a box-shaped shield member having at least five sides, said box-shaped shield member having an electrical length about half that of said conductor board, and having an opening at a top thereof to receive said conductor board therein so that said box-shaped shield member has an inside surface that faces a surface of said conductor board and a bottom of said conductor board is electrically connected to a bottom of said box-shaped shield member; and

a feeding mechanism configured to supply power to around a center of said conductor board and at the top of said box-shaped shield member.

2. The following is an examiner's statement of reasons for allowance:

Applicant's independent claim 6 is directed to a portable wireless apparatus comprising a conductor board including at least a circuit board, a boxed shaped shield

member having at least five sides, having an electrical length about half that of the conductor board, having an opening at a top thereof to receive said conductor board therein so that the boxed-shaped shield member has an inside surface that faces a surface of said conductor board and a bottom of said conductor board is electrically connected to a bottom of said box-shaped shield member and a feeding mechanism configured to supply power to around a center of said conductor board and at the top of said box-shaped shield member.

Applicant's independent claim 6 comprises a particular combination, which is neither taught nor suggested by the prior art. The closest prior art references of record, Jalloul et al. (US-5,440,317), Yamamoto et al. (US-6,906,677), Chen (US 2002/0024474), Ko et al. (US-5,781,158) and Nishikido et al. (US 2003/0058177) each differ from the claimed invention by not teaching or fairly suggesting all of the claimed limitations above, or fairly teaching/suggesting a reasonable combination and motivation of the cited prior art of record.

Accordingly, Applicant's claims are allowed for these reasons and for the reasons recited by the Applicant in the arguments filed on 1/16/2007, 7/27/2007, 12/11/2007 and the personal interview on 6/21/2007.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
